

BALDWIN[®]

ESTATE[™]

BENEFITS OF PVD

Baldwin Estate Nickel Alloy PVD provides a superior compound layer of corrosion protection that is backed with a lifetime finish warranty.

WHAT IS PVD?

PVD stands for Physical Vapor Deposition. It creates an extremely hard surface that resists wear and helps resist corrosion and pitting.

WHY PVD?

PVD is often preferred over Lacquer finishes when residing in areas with harsh weather environments such as:

- Coastal Salt Air
- Areas with high heat or below freezing temperatures
- Sustained Ultraviolet Exposure

Baldwin PVD will last 5 times longer than the chrome based PVD found from other manufacturers, while preserving the desired Polished or Satin finishes.

Baldwin Estate is proud to offer these 4 PVD Finishes:

- Polished Nickel – 055
- Polished Brass – 003
- Satin Nickel – 056
- Satin Brass – 044* (Industry Exclusive)

LIMITED LIFETIME FINISH™ WARRANTY

The Baldwin Lifetime Finish uses advanced finishing technology (physical vapor deposition) to create a finish highly resistant to the effects of weather and normal wear and tear. The Limited Lifetime Finish Warranty on Lifetime Finish™ products covers the original purchaser for as long as you own your home.
