

The outdoor hardwood floor.

The Iron Woods® Vanish Decking™ System lets you bring the refined, uniform aesthetic of interior hardwood flooring to your exterior spaces.

After all, you wouldn't allow gapped boards with visible plastic clips in your home. Now you will never again have to settle for them in your outdoor living spaces either.

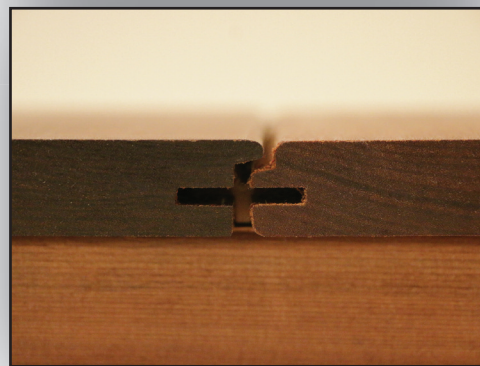

The boundaries between interior and exterior vanish once and for all. The perfect complement to the natural beauty of Iron Woods® hardwood decking, Iron Woods® Vanish Decking™ brings a new found level of sophisticated elegance to terraces, pool decks, gardens, walkways, open-air kitchens and outdoor living areas.

3x stronger. Infinitely more beautiful.

Traditional side groove and clip systems have a number of performance and aesthetic drawbacks. Typical plastic clips don't offer the necessary strength and durability to withstand temperature extremes, UV exposure, or the forces applied by durable hardwoods such as Ipe. Traditional fasteners tend to bend, move, fade or crack --allowing the decking to become misaligned and unstable. Other so-called "hidden fasteners" aren't much better, since they aren't really hidden at all. Invariably, the railroad tracks of unsightly fasteners are visible through the reveals in the deck slats and detract from the uniform beauty of the decking. With Iron Woods®' virtually invisible Vanish Decking™ system, the fasteners actually vanish from sight.

No gaps. The only thing you can see is the difference.

With no gaps or screws to detract from the rich, natural beauty of Iron Woods® hardwood or to cause unwanted cracks and splinters, it's clear that no decking solution available on the market today is more appealing to the eye or gentler on bare feet than the Iron Woods® Vanish Decking™ System.

How does Iron Woods® Vanish Decking™ work?

The Iron Woods® Vanish Decking™ System utilizes a proprietary clip-eclipsing wood profile that completely conceals the fastener system while still allowing water to drain. This profile also makes certain that small objects such as earrings or coins will not fall through the decking. Vanish Decking™ fasteners are made from coated stainless steel, and are up to 3 times stronger than traditional plastic clips. In addition, they prevent rusting to further extend the life of your deck. Vanish™ Decking System fasteners are designed to allow for contraction and expansion while keeping the decking in alignment. This ensures unparalleled strength, stability and beauty.

Available Species

Choose the right product for your project. Budget, Climate, Aesthetics and Site Conditions all impact product, profile, and species selections.

Iron Woods® Ipe Vanish Decking™

Iron Woods® Garapa Gold™ Vanish Decking™

The Difference is in the Grade – We Set the Standard

In the absence of official grading rules for hardwood decking, Iron Woods® by Timber Holdings set its own standards over 40 years ago. Consumers, Architects and Building professionals recognize the Iron Woods® Premium Select Architectural Grade as the benchmark for quality and consistency.

At Timber Holdings, we believe educated consumers are our best customers, so we provide them all of the information they need to make their own decisions and helpful tips about how to care for their decks. To learn more about our products and what sets Iron Woods® apart from the rest, please visit us at www.ironwoods.com.
