HardieZone® System		● HZ5® Substrate			

# Unique Formulation HZ5® Substrate

Not all fiber cement is the same. The James Hardie HZ5 product formulation contains the highest quality raw materials. Proprietary additives, combined with an innovative manufacturing process and product design, create a substrate specifically engineered to reduce water absorbtion and resist damage from wet or freezing conditions.

## PROPRIETARY ENHANCEMENTS CREATE THE MOST DURABLE JAMES HARDIE® SIDING EVER MADE

### Perfect balance of strength and workability

Our balance of high-quality Portland cement, sand and cellulose fiber delivers the best combination of strength and workability.

### Enhanced moisture resistance for unmatched durability

Patented and proprietary additives are chemically bonded within the HZ5 substrate matrix to provide durable moisture resistance.

### Increased dimensional stability

Our siding is engineered at the microscopic level to create a fiber cement composite with superior dimensional stability that helps protect against shrinking and splitting.

The advanced design of HZ5 lap siding improves drainage from top to bottom. In addition to our product formulation's enhanced moisture resistance, HardiePlank® HZ5 lap siding features a modified profile with a sloped top and bullnose drip edge for improved drainage over the entire outer face of the board.

**Sloped Top**  
Positive slope at top drains moisture to outer face of lap

**Profiled Drip Edge**  
Bottom bullnose drip edge allows moisture to drain away from lap

Integrity is ingrained  
**IN EVERYTHING WE DO.**

# Finishing Technology

## ColorPlus® Technology

Our advanced ColorPlus® Technology finishes deliver the ultimate in aesthetics and performance to your job site. Our products aren't simply painted at the factory. Multiple coats of color are baked onto the board, creating a vibrant, consistent finish for years of lasting character, adhesion and fade resistance.

GIVES HOMES A **BEAUTIFUL, CONSISTENT COATING** THAT PERFORMS BETTER, LASTS LONGER AND LOOKS BRIGHTER

### Superior finish adhesion

Our proprietary coating is engineered for superior adhesion to our substrate and applied to all surfaces, edges and features for durable performance.

### Superior color retention

Finish is cured onto boards after each coating step for a stronger bond, which allows for exceptional resistance to cracking, peeling and chipping.

### Superior UV resistance

Multi-coat, baked-on finish retains its vibrancy longer when compared to vinyl siding and paint on other siding products in all UV conditions.

ColorPlus®  
Technology

Our finishes help eliminate stress and reduce costly weather delays when it's too cold or damp to paint for extended periods. And there's no reason to question whether or not sub-optimal painting conditions will negatively affect your paint job. In fact, there's no longer any need to paint on-site during installation.

ColorPlus Technology finishes are fully cured in a controlled environment and arrive on your job site ready for year-round installation.

For timeless beauty

## HardieSoffit®

A home is only as strong as its weakest point. HardieSoffit® panels reinforce your work by protecting the vulnerable gap between eaves and exterior walls.

Available in vented, non-vented and a range of pre-cut sizes, these panels complete your design and protect it from moisture and pests.

HardieSoffit®  
16 in. Vented  
Smooth  
Arctic White

For complete confidence  
**EVERY DETAIL MATTERS.**

## VENTILATION BENEFITS

Using vented soffit improves ventilation in the attic space and reduces the chance of water vapor condensation that can lead to issues such as mold and mildew growth, stained ceilings and damage to the framing of the house.

In warm climates, HardieSoffit panels allow hot, humid air to escape, which not only helps prevent condensation in the attic, but can also help reduce air conditioning costs.

In cool climates, HardieSoffit panels help prevent condensation from forming on the interior side of the roof sheathing and reduce the chances of roof-damaging ice dams.

\*\*\*Linear Feet of Vented Soffit calculation is based on 2012 International Residential Code (IRC) Section 806.2, Exception 2, with a 50% upper attic and 50% lower attic split of required ventilation, using soffit with a net free ventilation of 5 square inches per linear foot. This Exception is also approved in 2015 IRC Section 806.2. Always consult a building design professional to confirm attic ventilation meets local building code requirements.

Using the proper amount of vented HardieSoffit panels is crucial to a building’s ventilation performance. James Hardie has taken the guess work out of soffit ventilation by providing the table below illustrating the minimum amount of vented HardieSoffit panels recommended for your attic space.\*\*\*

ATTIC SQ. FT.	LINEAR FT. OF VENTED SOFFIT	ATTIC SQ. FT.	LINEAR FT. OF VENTED SOFFIT

## HardieWrap®

No exterior cladding can prevent 100% of water intrusion. Your homes should have an additional line of defense. HardieWrap® weather barrier provides a superior balance of water resistance and breathability, keeping the area within the wall drier. This helps prevent moisture accumulation that may lead to mold and mildew growth.

### INSTALLATION ADVANTAGES

- Thicker, more durable material for easier, quicker installation
- Superior tear resistance helps prevent water infiltration
- Can be installed with staples in place of cap nails for cost savings
- Provides a higher level of performance, no matter what type of cladding you specify

We've got performance covered  
**FROM THE INSIDE OUT.**

## Finishing Touches

### ColorPlus Technology Accessories

#### TOUCH-UP KITS

Specially formulated to match ColorPlus Technology finishes, our Touch-up Kits offer resistance to aging, color change and chalking. Included in the kits, Touch-up Pens conceal nailheads and very small nicks and scratches.

#### COLOR-MATCHED CAULK

OSI® QUAD® MAX sealant offers a durable, lower maintenance sealant solution to color match James Hardie ColorPlus products.

### Trim Accessories

#### FLAT TABS

Reduce nail holes and improve the aesthetic of trim applications around windows, doors and band boards.

#### CORNER TABS

Use corner tabs to reduce the appearance of nail holes that would detract from the finished look of corner trim installations.

# Color Inspiration

Use deeper body colors for a warm, welcoming feeling. Make homes appear larger with soft contrasts between siding and trim. The right color combinations leave lasting impressions. Our color specialists designed the rich ColorPlus finish collection to help you express what's special about every home you build.

Khaki Brown

Cobble Stone

Timber Bark

SUBTLE BLENDS

Cast your homes in  
**THE MOST ROMANTIC LIGHT.**

COMPLEMENTARY

# Express the true nature of a home’s character with ColorPlus® Technology

Explore our color palettes and differentiate your homes with stunning curb appeal. These distinctive tones are drawn from natural environments, complementing your design with the look of America’s idyllic neighborhoods.

Colors may vary due to different monitor settings. Please see actual product sample for true color.
