Choosing the right door with the perfect design can make all the difference to your new renovation or decorating project!

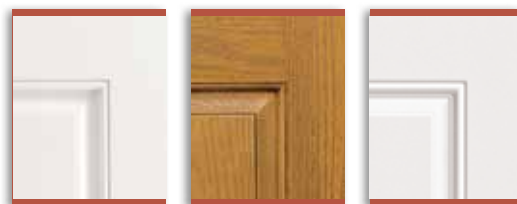

Masonite makes choosing the perfect patio door for your home as easy as...

123

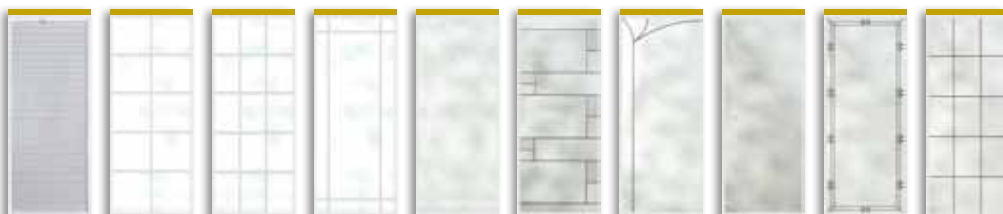

1 choose your configuration Upgrade your existing patio door opening or create a new one with a triple, double or single door configuration. Enhance your home with sidelites and transoms for an even more spectacular view. Because our patio doors can open-wide with an 180 degree swing – you gain valuable space and access inside and out.

2 choose your door Selecting the right door can bring years of enjoyment and hassle-free maintenance. Masonite Textured Fiberglass doors display exceptional, deep wood-grain detail. Our smooth fiberglass doors are perfectly engineered for durability and longevity, plus they're easy-to-paint for a custom look. Masonite Steel doors offer security and protection for your peace of mind.

3 choose your glass Maximize the beauty and visual impact of your new patio entry with one of our beautiful glass profiles designed to coordinate with any architectural design and décor. Our designer glass can create an extraordinary ambience, transforming your patio doorway into a vision of beauty and grandeur.

Masonite® Patio & Flush-glazed doors

Masonite® Patio System
Elegant Designs,
Certified Performance

Awe inspiring views and ample natural light are just on the other side of the wall. Why not let them in with a touch of style and a heap of energy saving, dependable performance.

Introducing the NEW Masonite® Patio door system featuring rich options such as: SpectraWeld™ designer glass, flush-glazed door panels, and premium frame components to make the ultimate passage from your home to the great outdoors.

BELLEVILLE® SMOOTH with Centennial 15" glass

Upgrade to flush-glazed Fiberglass Door Panels
More View, Less Maintenance

Wider Viewing Area

- ✓ 2'8" and 3'0" full lite door panels are available with up to a 20% wider viewing area

Less Maintenance:

- ✓ Compact profile holds less dust than conventional frames
- ✓ Simple profile is also easier to clean
- ✓ Fiberglass door panels will not dent or rust

Outstanding Aesthetics

- ✓ No screw holes or plugs
- ✓ Clean, simple glazing profile

Less Inventory

- ✓ Masonite's full lite flush-glazed system allows for field assembly, so less inventory is required

designer patio doors

The new Masonite Designer Patio Door Collection features SpectraWeld™ technology on select decorative glass panels. This unique system utilizes revolutionary composite material that bonds to the glass and simulates coming.

Masonite Patio systems are available as NFRC certified units in fully assembled or knock-down kits, with Low-E configurations qualifying for the tax credit. Door panels are also available in standard and flush-glazed configurations.

The designer collection comes standard with Low-E glass to make the system more energy efficient in both the summer and winter and also allows it to be tax credit eligible.

energy tax credit eligible

How we Build our Patio system

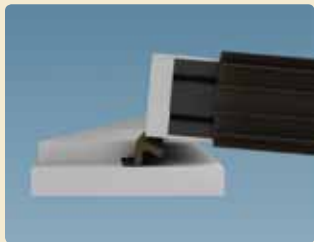

1 Composite Backed Sills
✓ A key to preventing water intrusion is properly sealing the bottom of the sill to the foundation. Our composite material will not rot and makes proper installation easy.

2 Premium Jambs
✓ Optional full composite vinyl jambs are pre-finished white, never rot and are maintenance free. Wood jambs are available as an option.

3 Astragal
✓ Premium thermal astragals with locking flush bolts and durable rubber boots seal off the elements with the performance to fit almost any application.

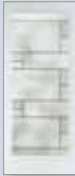

4 Weather Tight
✓ Compression weather stripping seals the edges of the doors and helps prevent water and air infiltration. Composite bottom door rail with sweep will not rot and fend off drafts.

5 Premium Construction
✓ Continuous head and sill construction maximizes the stability and rigidity of the assembled system while eliminating potential sources for water intrusion. Mull boots ease installation and keep components above potential water.

6 180° Open System **New**
✓ Specially designed hinging system allows the doors to open up a full 180° and fold flat against your home, creating more space.

ENERGY STAR® & TAX CREDIT

In 2010 the U.S. ENERGY STAR qualification criteria for a door system has changed. The new criteria eliminates the four climate zone maps that have been used to determine the system qualification performance. Climate zones will be replaced with a nationwide product performance criteria for opaque, less than or equal to 1/2 lite and greater than 1/2 lite qualification criteria.

Masonite doors and sidelites use premium polyurethane insulation and multi-pane insulated glass which creates superior insulating properties and lowers heating and cooling bills. Our NFRC certified assembled door units may qualify for ENERGY STAR 2010 and the current U.S. Federal Tax Credit. Other criteria exists for eligibility in the various programs but use the below charts as a general guideline for which Masonite products qualify.

Both ENERGY STAR and the U.S. Federal Tax Credit criteria are based on the system's performance as measured by the U-Value and the SHGC (Solar Heat Gain Coefficient).

1 U-Factor: Measures the rate of heat transfer through a product. It considers all elements of an assembly including conductivity, air flow, and glass emissivity. A lower U-Factor indicates a better insulating product.

2 SHGC: (Solar Heat Gain Coefficient) Measures the amount of energy that passes through glass from the sun, creating additional heat. The lower the SHGC, the better it blocks solar heat.

"IG" = Insulated Glass
*Please verify qualification with the NFRC performance label affixed to the door.
Based on 2'0" door unit width or greater (no sidelites).

TAX CREDIT

In 2009, the American recovery and Reinvestment Act of 2009 was signed into law. This law offers a U.S. Federal Income Tax credit to consumers for eligible doors of up to 30% of the purchase price of the door, with a maximum credit of \$1500. This tax credit is valid through the end of 2010. Please retain the NFRC performance label that is affixed to the door for required proof of product performance.
