

SUREDOOR

WEATHER RESISTANT ENTRYWAYS

BE SURE YOUR DOOR WILL LAST

EXTREME DURABILITY

SureDoor by Signature Door Inc. was designed to provide consumers an exterior wood door that can withstand harsh environments. SureDoor is fabricated using a paint-grade, engineered wood overlay for the exterior side. This exterior overlay uses proprietary acetylated wood technology that demonstrates outstanding durability and dimensional stability in the most extreme and challenging environments.

- 10 Year Warranty against rotting and swelling
- The answer for areas of extreme exterior exposure
- No overhang required to retain warranty
- Dark colors, including black, do not void the warranty
- One-piece overlay prohibits stile and rail separation
- Structural stability without compromising design freedom

DUAL FINISHING

With a SureDoor, you can have a weather-resistant, painted exterior, and the interior designed with a stained wood specie of your choice.

Have a color you want to match? Custom stain and paint matching is also available with our SureDoor product.

Stained Interior

Painted Exterior

DESIGN FREEDOM

All the design flexibility you've come to know and expect from Signature Door Inc. can be achieved with our SureDoor product.

- An array of shapes, configurations, and sizes
- A growing library of molding and panel profiles
- Manufactured in traditional stile and rail designs or contemporary plank and flush designs
- Available with divided light patterns
- Installed with the hardware of your choice, including multipoint locking systems, decorative "iron" grilles, and more!

STRUCTURAL STABILITY

One-piece overlay prohibits stile and rail separation.

Backed by a 10 year warranty, the SureDoor exterior is guaranteed not to rot or swell with added moisture.

Superior Performance in Adverse Weather Conditions
